**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph on page 48, lines 3-9 with the following:

-- The biological activity of the compounds of the invention has been measured using the CEM binding assay described above. The range of activity measured was 5 nM to 100 uM. The compounds disclosed herein are capable of binding to chemokine receptors at a measurable level, using the above-described assay or an assay which can determine the binding activity to chemokine receptors.--

Amendments made by the replacement of the paragraph on page 48, lines 3-9 of the specification with the above paragraph are represented below.

The biological activity of the compounds of the invention has been measured using the CEM binding assay described above. The range of activity ~~was measured was over an IC<sub>50</sub> value range of~~ 5 nM to 100 uM. The compounds disclosed herein are capable of binding to chemokine receptors at a measurable level, using the above-described assay or an assay which can determine the binding activity to chemokine receptors.
